

**REMARKS**

Applicant has amended Claims 8, 31 and 41 to add functional language, as discussed in a telephone interview with the Examiner to overcome all rejections by the Examiner. The functional language concentrates on the multi-beam antenna and Ethernet being an internal part of the hub. The references like Zendle describe the Ethernet as a service that customers may have that is used outside the source and not as an internal part of the hub between the source and the multi-beam antenna.

In view of the aforementioned remarks and amendments, it is believed that claims 2-29, 31-36, and 40-44 are in condition for allowance and allowance of these claims is respectfully requested.

Respectfully submitted,  
/John J. Elnitski, Jr./
